

American Institute of Building Design

Who is the AIBD?

Since 1950, the American Institute of Building Design (AIBD), the nationally recognized association of Professional Building Designers, has provided its members professional and educational resources, and has developed nationwide design standards and a code of ethics for the building design profession. Today, the AIBD represents professional and associate members in 46 states and throughout Canada and abroad. Its chartered societies are active in their respective legislative arenas and work to promote public awareness of the building design profession.

Mission Statement

The American Institute of Building Design is dedicated to the development, recognition, and enhancement of the profession of building design. AIBD strives to protect and enhance our member's ability to practice their profession. AIBD is committed to providing quality continuing education to ensure that our members remain current with technology, materials and building codes. AIBD is also committed to establishing and maintaining professional relationships with other trade, business, and professional organizations within the design and construction industry. At all times AIBD will hold itself to the highest standards of ethics and professionalism as specified by our institute's by-laws and code of ethics and will uphold the protection of the health, welfare, and safety of the general public. This commitment is to the public and industry we serve and the profession we represent.

Key Benefits

- nationwide design standards
- professional code of ethics
- members in 46 states, Canada and abroad
- continuing education
- cutting edge technology

Benefits to Homeowners and Builders

Building a home incurs the greatest financial burden most people will face in a lifetime and few envision how complex the process is until they are tangled in a jungle of restrictive covenant, building codes, zoning ordinances, design options, vendor and contractor choices and so on. Yet, most states do not have a licensing requirement for residential building designers. When a new home or addition is in your future, a specialist in the discipline of residential design is your best choice to guide you through the design/building experience. Accordingly, it makes sense to secure design services from a qualified experienced source - a professional member of the American Institute of Building Design.
